Lab # 5

Q1: Drivers are concerned with the mileage obtained by their automobiles. One driver has kept track of several trips by recording miles driven and gallons used for each trip. Develop a C program that uses a **while** statement to input the miles driven and gallons used for each trip. The program should calculate and display the miles per gallon obtained for each trip and print the combined miles per gallon obtained for all tankfuls up to this point.

Q2: Write a C program to print the following pattern using a single while statement with conditional operator.

```
****
++++++++
